

**SOIL** **TECHNICAL RIDER**

IMAGE is 4 times PAL DV 720x576 25 frames per second.

Signal source 4 DVDs provided by the artist  
played back non-synchronised from 4 DVD players

display 4 High contrast beamers, Projected in 16:9 format  
The internal software of the beamer must allow for free ratio definition onto 4  
white horizontal screens.  
No black frame.  
All screens slightly suspended from the wall

Or 4 identical and big plasma / LCD panels

---

AUDIO is Quadro-sound.

Signal source the 4 DVDs inside the 4 DVD players

Display 4 speakers two in front two rear  
sound is generally very subtle but with a noticeable low end  
That should indeed be recognised,

Small mixing board is advised for detailed adjustment of sound
